

Caring for people's health as a trusted partner

Thornton & Ross' mission "Caring for people's health as a trusted partner" is more valid now than ever. Today we applaud all front liners fighting for the health of all of us. T&R is a key part of STADA's global production network and is working at full capacity and speed to keep supplying medicines. We thank more than 6,000 of our employees in production, laboratory and warehouse with a global initiative! More than 11,000 employees are working without respite from home or in our sites to fulfil our purpose to ensure patients get the medicines they need.
